

Hair-on-Hide

BEHIND THE DESIGN

Hair-on-hide is a striking, natural material that celebrates the raw elegance of the animal's original form. Each piece is one-of-a-kind marked by organic patterns, rich textures, and variations that can't be replicated. The preserved hair offers a tactile, dimensional surface that brings warmth, depth, and character.

CARE INSTRUCTIONS

- **Vacuum regularly** using a soft brush attachment to remove dust and debris without disturbing the hair.
- **Brush occasionally** in the direction of the hair with a soft bristle brush to keep the hide looking smooth and fresh.
- **Blot spills immediately** with a clean, dry microfiber cloth. Avoid rubbing, which can mat the hair or spread the stain.
- **Spot clean gently** using a damp microfiber cloth. Use sparingly and test first in an inconspicuous area.
- **Avoid soaking the hide** excess moisture can cause hair loss or curling. Always allow to air dry naturally.
- **Do not use harsh chemicals**, solvents, or leather cleaners not specifically labeled for hair-on-hide.
- **Keep out of direct sunlight**, which can fade both the hair and the hide over time.
- **Avoid heat and humidity extremes**, which can dry out or damage the hide backing.
- **Rotate usage areas** on upholstered pieces to distribute wear evenly and prolong the hide's natural look.
